CAD Services

CMS Analytics transforms your data into actionable business intelligence and it empowers you to improve the performance of your Engineering Department effectively. CMS Analytics gives you information about the reliability and compliance of your Inspection, Testing and Maintenance Program. It contains metrics for productivity, backlog, turnaround time and customer satisfaction. The tool shows long-term trends and highlights exceptions, so that users can translate the information into impactful action plans.

### Benchmark performance

Establish baselines with your teams. Monitor and celebrate improvements over time.

### Manage exceptions

Pinpoint your outliers, identify root causes and work with your teams to resolve them.

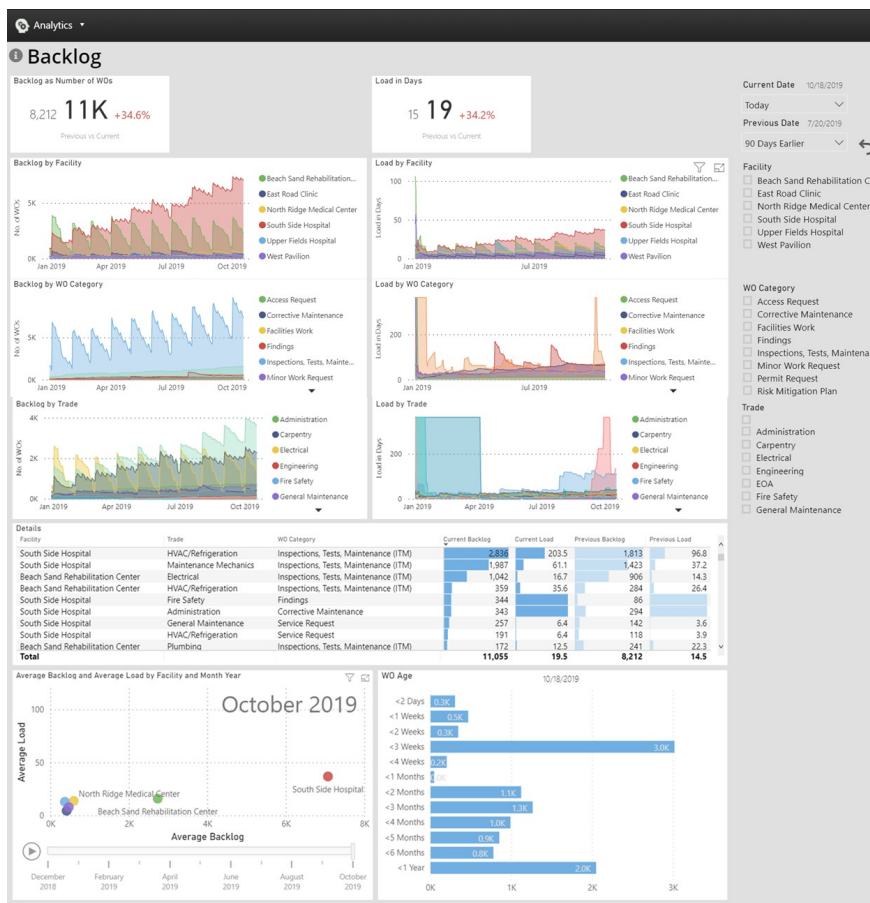

### Allocate effectively

Ensure that your teams have the right priorities, so that time-sensitive priority work is done on time.

### Promote compliance

Confirm that your maintenance program is reliable.

Health-check your backlog and identify issues that require attention.
